Cal OES INLAND REGION

Rock Creek Dam Incident, Auburn, Placer County

- On 01/10/17 at 2142 hours, the Pacific Gas and Electric (PG&E) reported that an uncontrolled overflow of the Rock Creek Dam has occurred due to recent flood waters due to the lake reaching capacity. The water is spilling through the spillway. The California State Warning Center (CSWC) conducted all appropriate notifications per Standard Operating Procedure (SOP). There is currently no threat to the public. The Sheriff's Department would be the final authority to make a decision on whether or not to perform precautionary evacuations due to the proximity of structures to the dam.
- Per Department of Water Resources (DWR), at 1206 hours on 01/11/17:
 - The Dam peaked at 229 cfs. and stopped spilling at 0524 hours on 01/11/17.
 - The outlet is open with 85 cfs. Currently and no evacuations were needed.

WEATHER SYNOPSIS BY REGION

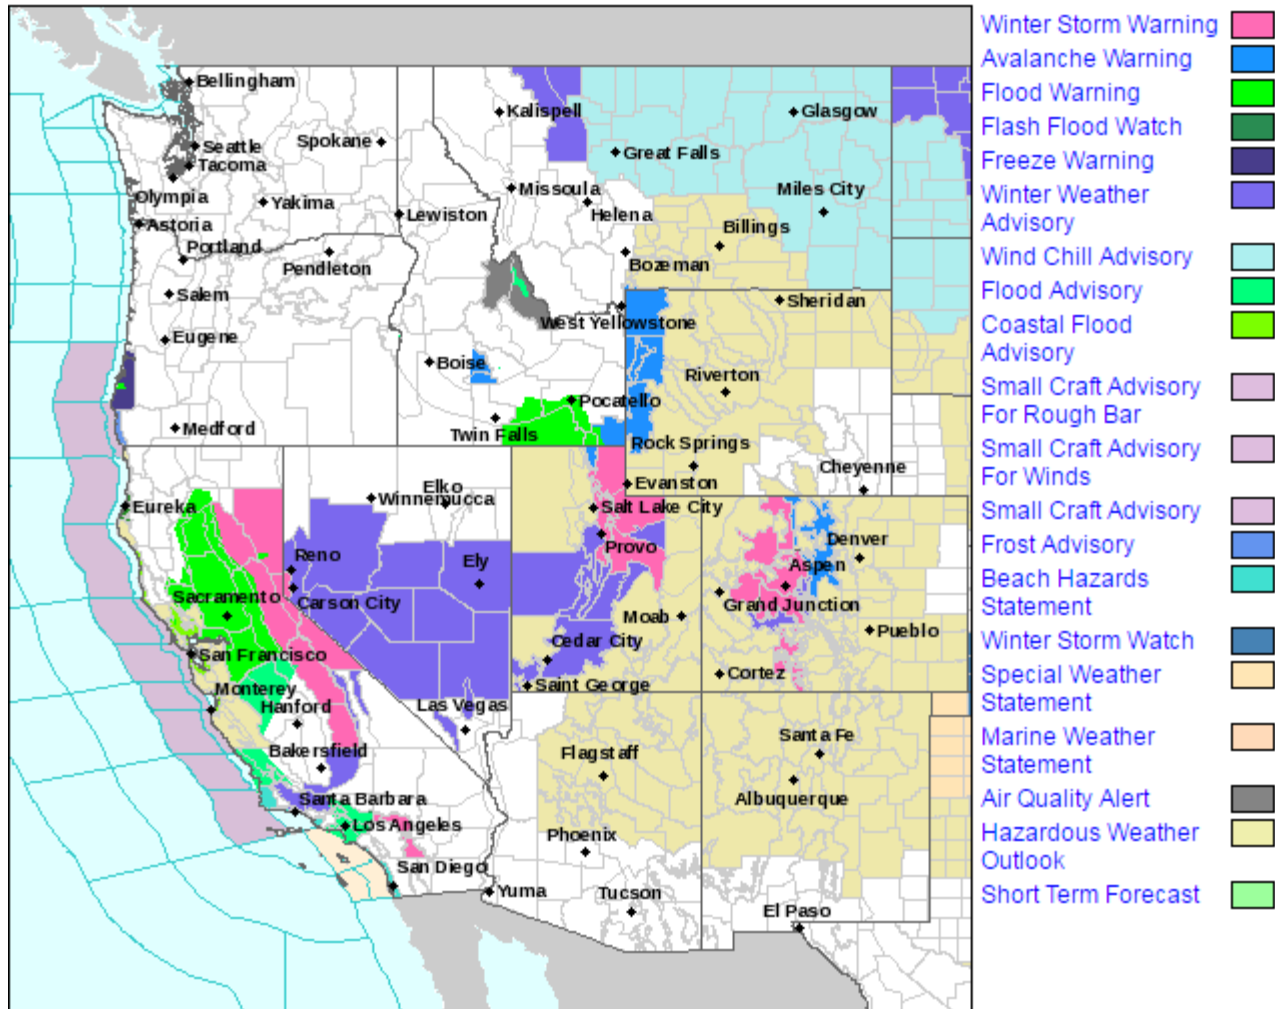

NORTHERN CALIFORNIA

A wet unsettled weather pattern will continue until late today. Showers will be more common in the mountains, but they will be possible just about anywhere in Northern California. Snow levels will be near 2500 feet near the Oregon state line and 4000 feet further south. Dry weather is expected tonight until about midday Tuesday as high pressure moves over the region. Periods of overnight and morning valley fog may develop and persist, but some light northerly winds may also develop in the northern Sacramento Valley and nearby foothills, and would keep that area somewhat fog-free. Another major, wet weather system is expected to reach the north coast late Tuesday. By Wednesday heavy precipitation and strong winds will cover a large part of the region, with snow levels 6000 feet or higher.

SOUTHERN CALIFORNIA

Another storm will bring periods of rain to the area today. The rain will end across Central California by early Friday morning, but scattered showers will continue across Southern California through Friday afternoon. Most locations away from the deserts will receive an additional 1 to 3 inches of rainfall through Friday. The snow level will be around 6,000 feet today and then drop to around 4,000 feet today and tomorrow. South to west winds of 20 to 40 mph with gusts to 60 mph will continue to surface across the wind prone mountain and desert areas through this morning. Maximum temperatures will remain in the upper 30s and 40s across the mountains and 50s to low 60s in the valleys today. Temperatures will cool to the 30s to low 40s across the mountains and upper 40s and 50s in the valleys today and tomorrow. A ridge of high pressure will build into California from the Pacific bringing a slow warming and drying trend Saturday through early next week. North to northeast winds of 15 to 30 mph with gusts to 50 mph will surface across the mountains and below the canyons and passes of Southern California Friday evening through Saturday morning.
